

HERE'S WHAT CUSTOMERS ARE SAYING ABOUT TTN

TESTIMONIALS

RUAN

VP of Fleet Services, Ruan Transportation

"I outsourced the handling of emergency road call events to TTN Fleet Solutions. After an extensive review period, I selected TTN over their competitors for several reasons. TTN was able to customize the process to meet Ruan's needs, provide consistency in the process and the flexibility to ramp up in peak periods, when needed. Just as important is TTN's ability to provide detailed information on events and help determine their causes. TTN is a true partner for Ruan, providing customer-focused service for its drivers and the information needed to improve service to its customers."

SCHNEIDER

Benjamin Holcomb, Schneider National

"Not going to lie, but I love Schneider. My teammate and I have been sitting on the shoulder since 1:30 a.m., waiting for a tow truck. Someone from TTN has called us more than once to make sure we have food and water and fuel and heat. I knew they were great, but OMG they are GREAT!"

Maverick

Maintenance Manager, Maverick Transportation

"TTN took the guessing game of hiring a third-party provider to look after our fleet. Making the switch to TTN strengthened our readiness, downtime, cost-savings, data analysis, and the best customer service that a carrier could ask for, for drivers. Their impressive array of experts has allowed us to really hone in improvements. Maverick shopped around with upwards of a dozen other breakdown service providers, and TTN stood well above the rest. I could not have asked for a better provider to quickly adapt to our in-house processes and protocols, or for a better call center of professional agents. I recommend TTN's services to any carrier."
